## EMERGENCY CHECKLIST FOR YOUR CAR

Even if you are at home when a disaster strikes, and your home is well stocked, you may still need the supplies in your car. Your house may not be safe to enter, or may catch fire after a disaster like an earthquake.

Your car will be one of your most important resources after a disaster strikes. Keep it mechanically sound, and pay close attention to the exhaust system. A leaking exhaust system could kill.

- Always keep your gas tank full! Fill it when it reaches 1/2 a tank. You will thank yourself the first time you are stuck in a traffic jam in bad weather.
- Think of your car's trunk as a big steel supply cabinet. Keep your supplies in the trunk along with other items like tools, jumper cables and spare tire.
- Keep the car mechanically sound and ready to use.
- Keep supplies in the car for use in an emergency.
- Replace your battery every 2-3 years. In an emergency, your car battery will need to run the radio and heater for extended periods.

**Do this yourself or have a mechanic check the following items on your car to keep it ready:**

- Battery
- Antifreeze
- Wipers and windshield washer fluid
- Ignition system
- Thermostat
- Lights and flashing hazard
- Exhaust system
- Heater
- Brakes
- Defroster
- Make sure the tires have adequate tread
